■ GEBERIT

Bathroom design redefined.

Geberit Monolith

A timeless design language for your bathroom.

There are a few different ways you can follow to give shape to your ideas for a new bathroom. The Geberit Monolith sanitary module for WCs and bidets lets you create a bathroom using clear, well-designed elements. While they might look simple at first glance, these sanitary modules offer much more, thanks to their unique combination of function and design. They can be installed with most readily available ceramic appliances. What's more, in most cases they can be quickly hooked up to existing connections, without any structural changes – a real advantage in major renovations. Geberit Monolith gives you freedom to realize your own design without a lot of work.

More space.
Many options.

The Geberit Monolith sanitary module can be combined with ceramic appliances from most other manufacturers. You have great freedom of choice in the design and construction of your bathroom. Choose from several different colours for the glass front cladding – another way to personalize your bathroom's design.

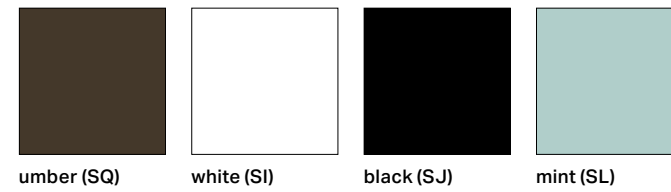

Easily installed.

Monolith sanitary modules overview.

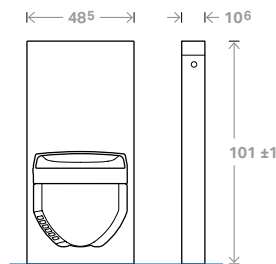

Don't leave anything to chance when creating your dream bathroom. This overview of all colour and design variations and complete dimensions of each Monolith sanitary module will help you in your planning.

Colour range

Geberit Monolith for WCs

The Geberit Monolith sanitary module for WCs offers environmental dual-flush technology and can be combined with a variety of floor standing or wall-hung WC ceramic appliances. The Geberit AquaClean models 8000 and 8000plus can also be easily installed on the award-winning designer model.
