FLOOR-EVEN SHOWER SURFACES

The shower is more than just somewhere to get clean – it also helps you feel refreshed and gives you time to think. So your shower should stand out both in terms of function and look. Floor-even shower surfaces are the centrepiece of any wellness bathroom.

GEBERIT CLEANFLOOR30

ELEGANT AND FUNCTIONAL

The floor-even Geberit CleanFloor30 shower surface is simple to install, durable and easy to clean, combining an attractive design with smart details that make everyday life noticeably easier.

Consistent interior design

Secure footing thanks to Class B slip resistance

Silky-smooth surface that is pleasant and warm to the touch

Simple cleaning and care

Meets sound insulation standards

The shower surface is finished with an antislip mineral composite material for maximum safety.

The integrated comb insert prevents clogging and can be removed for cleaning with a single hand movement.

The Geberit CleanFloor30 shower surface impresses with its elegant design made of a durable mineral composite material. The silky-smooth surface feels pleasantly warm and allows water to bounce off gently. The completely homogenous material ensures stability, durability and slip resistance. The shower surface is available in classic white, grey and graphite colours and a wide range of sizes.

- Stability and safety thanks to durable mineral composite material
- Warm to the touch and antislip
- Hygienic and easy-to-clean surface
- Available in a range of sizes

GEBERIT CLEANFLOOR30

THE ORIGINAL NOW HORIZONTAL

The Duofix installation frame for WCs and washbasin areas offers the same well-known advantages of the original when used for showers, including quick and easy installation and a stable and precise underlay.

↑
The factory-prefabricated Duofix installation frame for showers offers the same benefits as the original for WC systems and washbasin areas.

↑
The factory-set sealing fleece saves time and provides a secure seal.

Shower surface and installation frame come together in a system designed to work in perfect harmony. The installation frame, which is prefabricated at the factory, provides a stable and precise base that allows plumbers to install shower surfaces quickly and securely. And that's not all, because the installation frame offers flexibility and can be rotated 180 degrees to be used with steel trays. The sealing fleece also comes prefitted from the factory, not only providing a highly reliable and secure seal but also saving time and minimising interactions with other trades.

- Quick and easy installation
- Stable and secure thanks to numerous contact points and central foot support
- Factory-set sealing
- Suitable as an installation system for CleanFloor shower surfaces and steel trays.

↑
Separation of trades helps avoid confusion on the building site.

GEBERIT OLONA SHOWER SURFACE

QUALITY YOU CAN FEEL

Consistent room design

Secure footing with top-tier
Class C slip resistance

Silky-smooth surface that is
pleasant and warm to the touch

Simple cleaning and care

Surface-even or lay-on
installation possible

Impressively elegant, the Geberit Olona shower surface boasts a noticeably strong design and white matt finish. It is made from mineral composite material and finished with gelcoat to ensure secure footing. Available in many different formats, it provides flexible design options for shower areas.

↑
White matt aesthetic: the shower surface is available in various formats to meet every design requirement.

TOOL-FREE INSTALLATION AND HEIGHT ADJUSTMENT

The cleverly designed installation system for Olona, Sestra and Melua shower surfaces saves time during installation, provides more flexibility and makes it easy to seal everything.

SEALING FLEECE

The shower surface is equipped with a circumferential sealing fleece at the factory.

DRAIN COVER WITH INTEGRATED HAIR TRAP.

Easy to remove to clean the hair trap.

FEET SET

Height-adjustable without tools thanks to large, grippy nut.

CROSSBARS

Easy to install on the bottom side of the shower surface by gluing.

The Geberit feet set can be installed without tools and positioned quickly and accurately to suit any requirements. You can adjust the height of the feet as required, making it easy to compensate dimensional tolerances without needing to use any extra components or material. The factory-set sealing fleece makes it easier to integrate shower surfaces into the sealing level.

- Installation without wet construction
- Tool-free installation
- Easy to adhere to resin stone shower surfaces
- Versatile product design for bathroom and sanitary installation
- Available in two sizes: height adjustment from 6 to 12 cm or 9 to 21 cm

SIMPLE TOOL-FREE INSTALLATION

↑
The supporting crossbars are equipped with an adhesive surface.

↑
After removing the protective foil, press the rails firmly in place to bond them to the underside of the shower surface.

↑
Simply push the set of feet into the rail and fix in place by turning.

SHOWER CHANNELS

Geberit CleanLine shower channels combine an outstanding look with function and hygiene, making bathrooms feel more spacious and creating an almost completely seamless floor surface. A range of designs, models and sizes gives you the freedom to create unique looks to suit any bathroom.

GEBERIT CLEANLINE30

MODERN AND FUNCTIONAL DOWN TO THE FINEST DETAIL

Geberit CleanLine30 shower channels are sleek, functional and sophisticated, down to the finest detail. Made of stainless steel, they combine modern design with maximum everyday practicality. The narrow shower channel fits elegantly into any shower surface – either mounted back-to-wall or in-centre.

Classic brushed stainless steel or on-trend black

Floor-even access for completely tiled shower areas

No hidden channels to minimise dirt and bacteria deposits. The removable comb insert makes the drain easy to keep clean

CleanLine30 is available in four lengths from 90 to 160 cm and can be shortened as required. Whether for a new building or renovation, the shower channel comes with two water seal depths, making it suitable for use in any shower area. The shower channel is incredibly easy to keep clean thanks to the floating waste plug with integrated comb insert. The sealing membrane, which is pre-mounted at the factory, ensures a clear separation of trades and makes installation quick and simple.

Can be customised to the width of the showering area and is also suitable for large tile sizes.

- Sleek, functional design with clean lines
- Easy to clean thanks to integrated comb insert
- Two colour options: brushed stainless steel or black with anti-fingerprint coating
- Pre-mounted sealing for quick installation
- Available in four lengths that can be cut to length as required

Floor-even access for completely tiled shower areas

Tiled shower areas

Geberit CleanLine50 is the slimmest member of the Geberit CleanLine family with a modern, minimalist design and width of just 3 cm. Its integrated slope and new triangular contour in the channel cross-section ensure rapid water drainage.

reddot winner 2023

No hidden channels to minimise dirt and bacteria deposits. The removable comb insert makes the drain easy to keep clean.

Just like the other shower channels in this bathroom series, the Geberit CleanLine50 provides an innovative and easy-to-clean water guide to the central drain. Water is openly channelled to the drain via a collector profile. There are no hidden areas, ensuring that dirt and unpleasant odours cannot accumulate. An anti-fingerprint coating makes cleaning even easier: simply wipe the profile down to keep everything clean.

- Extremely slim design
- Triangular profile and integrated slope for fast water drainage
- Anti-fingerprint coating

ALL SET – NO SWEAT

The smart Geberit CleanLine installation system simplifies the plumber's work and makes installation quick and simple.

The timeless linear design of shower channels makes them a great choice for both private and commercial bathroom customers. Geberit CleanLine shower channels offer a range of additional benefits. They are as easy to install as floor drains thanks to their sophisticated technical design. The profile can be integrated into the floor like a tile, which means even tilers can work well with Geberit CleanLine. The ends of each profile can be cut to length, making them easy to adjust to the requirements and measurements of any shower area.

- Classic, discreet, linear design
- Design options suitable for any interior style
- Unique construction with cover profile, central drain and comb insert
- Effortless installation thanks to complete installation set
- Reliable seal thanks to premounted sealing fleece, firmly injection-moulded at the factory
- Easy to adjust thanks to channel profiles that can be cut to length

↑
Connecting piece for communal showers makes it easy to install several shower channels seamlessly in a row.

↑
Sound-decoupled base unit to meet strict sound insulation requirements in buildings.

↑
Comb insert with hair trap helps prevent clogging.

↑
Profiles can be cut to length to suit different requirements.

POINT AND WALL DRAINS

Geberit shower and wall drains combine a range of benefits, including aesthetic design, modern functionality, high discharge rate and reliable hygiene – perfect for contemporary and convenient bathroom design. Enjoy the comfort of a perfectly matched water guide and discover a wide range of attractive designs.

GEBERIT CLEANWALL

CONSISTENTLY FLOOR-EVEN

Continuous floor tiling

Floor-even access for fully tiled shower areas

No interruption of the floor surface caused by the drain

Geberit CleanWall moves the drainage of floor-level showers from the floor to the wall. This gives shower areas an elegant and modern look, as the floor design can be completely uninterrupted.

The discreet wall drain is easy to keep clean.

You can also tile the Geberit CleanWall cover to match your bathroom design.

The optional collector profile can be mounted directly in front of the wall to create a slope towards the wall drain, collecting dirt and deposits that are easy to wipe away.

A comb insert behind the design cover traps hair and is easy to remove for cleaning.

SIZES

Dimensions in cm

- Innovative solution for integration in prewall systems
- Clear separation of trades thanks to pipe placement behind the wall
- Optional collector profile for efficient and precise formation of the slope in the floor

Geberit CleanWall allows shower surfaces and drainage to create the perfect seamless look. Floors can be designed without any channels or drains, making it ideal for accessible, step-free shower areas. Wall coverings in various colours, including stainless steel, plastic and tile-bearing options, provide freedom of design. Installation is easy because all the elements you need for water supply and drainage are located on one installation level.

↑
Geberit CleanWall works perfectly with the Geberit GIS, Duofix and Kombifix installation systems.

GEBERIT NICHE STORAGE BOX WITH
WALK-IN SHOWER PANEL

EVERYTHING IN ORDER UNDER THE SHOWER

Walk-in shower panel without any bulky aluminium profiles

By using the prewall, the niche storage box creates additional storage space without restricting freedom of movement

No water or dirt residue in the niche storage box, as water can drain freely from the shelf surface

←
The niche storage box can be integrated into the wall design.

↑
The mounting frame for the niche storage box is compatible with Geberit installation systems.

The Geberit niche storage box provides shelf surfaces without restricting freedom of movement underneath the shower. It allows water to drain off at the front, reliably preventing any build-up of residue. The Geberit walk-in shower panel is fastened to the prewall without any visible fittings or profiles, making the surfaces even easier to clean.

- Easy integration of niche storage box and walk-in shower panel into the prewall system
- Seamless integration into the planning and installation processes for the prewall system
- Quick and straightforward installation of the shower area.

The walk-in shower panel is held securely in place without any visible fittings.

GEBERIT SET OF FEET FOR ACRYLIC BATHTUBS AND SHOWER TRAYS

TOOL-FREE HEIGHT ADJUSTMENT

The Geberit set of feet makes it significantly easier to install and adjust the height of sanitary acrylic bathtubs and shower trays. The sophisticated design consists of crossbars, two floor crossbars and four plastic feet. The feet are clicked into the crossbar and manually adjusted to the correct height with screw connections. Even subsequent adjustments are very easy to make without the need for tools.

- Fast and easy installation
- Straightforward height adjustment with a large adjustable range
- Feet movable in the crossbar
- High bearing load of 150 kg per foot

Bathtub feet
90–210 mm

Shower tray feet
60–120 mm

←
The bathtub feet make height adjustment easy.

1 A double thread in the tub feet makes height adjustment quicker and doubles the adjustable range. 2 The plastic feet can be moved in the crossbar, making it easier to find the optimum standing position on the surface. 3 The crossbars are covered with sound insulation tape at the factory to ensure the bathtub edge can be positioned precisely and securely against the wall. 4 Suitable wall anchors make it easier to achieve back-to-wall installation of bathtubs without gaps or subsequent movement.
